Experience

Katapult Labs

Aug 2025 – Present

Full Stack Engineer

Remote

- Working for **Trashie**, a New York-based sustainable rewards platform that empowers consumers to recycle unwanted clothing and textiles in exchange for TrashieCash™, redeemable across a wide network of retail and lifestyle brands.
- Designed and implemented a *Stripe* integration to manage the full discount coupon lifecycle: creation, distribution and redemption — supporting Trashie's rewards infrastructure across its brand partner network.
- Engineered logistics and returns integrations with *FedEx Easy Returns*, *UPS*, and *Happy Returns*, enabling QR code-based return operations that streamline the Take Back Bag experience at scale.
- Enhanced the web authentication system using *Firebase Authentication*, improving login reliability, security flows, and overall user experience across web and mobile platforms.
- Developed and maintained full-stack features across the web (*React*) and mobile (*React Native*) applications, consuming and extending *Node.js* backend services and *PostgreSQL* databases hosted on *Google Cloud Platform*.
- Leveraged *Google Cloud Platform* services for infrastructure, storage, and deployment pipelines, ensuring scalability and reliability of production workloads.
- Adopted AI-assisted development as a core part of the daily workflow, using *Claude Code*, *Cursor* and other AI-powered coding tools to accelerate feature delivery, reduce development cycle times, and improve code quality through intelligent code generation and review.
- **Tech stack:** TypeScript, JavaScript; Node.js, NestJS, React, React Native; PostgreSQL; Firebase Authentication; Google Cloud Platform; Stripe API; FedEx, UPS & Happy Returns APIs; Claude Code, Cursor (AI-assisted development).

Personal Projects and Technical Practice

May 2024 – Aug 2025

Software Engineer — Full-Time Upskilling Period

Remote

- Dedicated full-time period focused on independent technical practice and skills development between professional engagements.
- Practiced backend development using *NestJS*, *Ruby on Rails* and *Python*, focusing on building robust APIs, applying clean code practices and improving architectural design.
- Created and deployed a personal portfolio [website](#) to showcase professional experience, technical skills, and project highlights.
- Explored modern development tools and best practices, including *Docker*, *Kubernetes*, CI/CD, TDD and dependency injection.
- **Tech stack:** Node.js, NestJS, React, Ruby on Rails, Python; Sequelize, TypeORM, ActiveRecord; Docker, Kubernetes, PostgreSQL, MongoDB.

Gases del Caribe SA ESP

Jun 2022 – May 2024

Full Stack Developer

Barranquilla, Colombia

- Worked on **Sistema Brilla**, a web platform enabling users to apply for non-banking credits and pay monthly through their gas bill. Contributed to backend, frontend, and database layers.
- Co-led the migration of the backend from *Ruby on Rails* to *Node.js* (with the *NestJS* framework and the *Sequelize* ORM) to improve scalability and performance.
- Led the development of integrations with external store services using *NestJS*, consuming third-party APIs to expand platform functionalities.
- Designed and implemented PDF document processing and digital signing using *NestJS* and *AWS S3 Storage*.
- Created and managed background workers for **Sistema Brilla** using the *Sidekiq* tool.
- Developed new user interfaces and features in **Sistema Brilla** using *React* with *Redux*, enhancing usability and visual consistency and improving user experience.
- Led the development of **Messaging**, an internal application for sending WhatsApp and SMS notifications to company users.
- **Performance improvements:** Implemented database query optimizations, resulting in a 30% faster page load time across the platform.

- **User impact:** Contributed to a 25% increase in user satisfaction scores (measured via internal surveys) thanks to UX improvements and faster response times.
- **Tech stack:** JavaScript, TypeScript, Ruby; Node.js, NestJS, React, Next.js, Ruby on Rails; Sequelize, ActiveRecord, Redux; PostgreSQL; Docker, Redis, Sidekiq, GitHub Actions; AWS S3.

Koombea

Backend Developer

Feb 2021 – Jun 2022

Barranquilla, Colombia

- Worked on **Doit-Center** (an e-commerce platform for a Panamanian store) as backend developer, adding new features and providing support and maintenance.
- Led the development of core backend features using *Ruby on Rails*, including business logic implementation, API design, and data modeling to support key e-commerce functionality.
- Integrated *Shopify* services with the backend and database to synchronize product catalogs, manage orders, user data and automate inventory updates in real time.
- Co-led the development of new multi-order logic to allow users to place and manage multiple product orders in a single transaction, improving purchasing flexibility and backend processing efficiency.
- Led deployment of new features to testing and production environments using *AWS EC2*.
- **Tech stack:** Ruby on Rails; PostgreSQL; ActiveRecord, Shopify; Redis, Sidekiq, Docker; AWS S3, EC2; GitHub Actions.

Projects / Freelance

Analysis pipeline for whole exome data

Freelance

May 2020 – Oct 2020

Barranquilla, Colombia

- Worked with a Universidad del Norte professor to build a Python desktop application that processes human genome data as a pipeline.
- Implemented a pipeline using Python to process whole exome sequencing files with specialized bioinformatics tools.
- Built a Python GUI for the desktop application to allow non-technical researchers to run the pipeline.
- **Tech stack:** Python.

Global Game Jam 2020

Jan 2020

- Built a platform game named *Otto* in 48 hours using Unity, collaborating with a team of developers and artists.

Education

Universidad del Norte

Bachelor of Science in Systems and Computing Engineering
Cumulative GPA: 3.9/5

2016 – 2020

Barranquilla, Colombia

Certifications

- Data Engineering using Python | Platzi | Issued Oct 2019 – No expiration date.
- Python Programming | Platzi | Issued Sep 2019 – No expiration date.
- The Complete Ruby on Rails Developer Course | Udemy | Issued Mar 2021 – No expiration date.

Skills

Programming Languages Proficient in JavaScript, TypeScript, Ruby, Python; Familiar with C#, CSS.

Technologies / Libraries Proficient in Node.js, NestJS, Ruby on Rails, ReactJS, React Native, Redux, PostgreSQL, ActiveRecord, Sequelize, TypeORM, Firebase Authentication, Google Cloud Platform, AWS, Docker; Familiar with Next.js, SpringBoot, Django, Astro, MongoDB, Kubernetes, .NET, WordPress.

AI-Assisted Development Proficient in leveraging AI coding tools as a core part of the development workflow; including *Claude Code* (agentic terminal-based development) and *Cursor* (AI-powered code editor) to accelerate feature delivery, reduce cycle times, and improve overall code quality.

Languages Native Spanish speaker; English B2 – Certified by IELTS / British Council.
